

.zen.blog.master

⌵ A Zen Blog Master Page defines the standard side columns for all blogposts that use it.

⌵ Master page side columns can only be edited from this page.

⌵ The blog calendar will automatically be inserted in whichever column exists, favoring the right column. If no columns are defined on this page, a right side column will be displayed so the calendar will have a place to live.

⌵ Content in this middle column will not appear anywhere else. Your blogpost contents will replace this center section.
